

Axel Leclercq

React Native Developer · Mobile & IPTV

Chilly-Mazarin (Île-de-France), France · github.com/Akeuuh · linkedin.com/in/axel-leclercq

ABOUT

200,000 downloads, apps for Le Point, Dayuse and TF1+ — an energy engineer turned React Native developer, I've been building consumer mobile apps for over 5 years, from first commit to store release. Currently at e-TF1 on the TF1+ IPTV app. Beyond mobile, I tinker with Swift/macOS, TypeScript, and automate whatever I can with agents.

SKILLS

- Mobile: React Native, Swift / SwiftUI, Java, App Store, Google Play & Huawei publishing
- Languages: TypeScript / JavaScript, Swift, Rust, Lua, Ruby, Shell, SQL / NoSQL
- Web: HTML / CSS / JavaScript, React Native Web
- Tools & process: Git, CI/CD, GitLab / Jira, Homebrew, Neovim, Docker / Podman, Figma, Storybook, AI agents (Claude Code, OpenCode)
- Soft skills: Knowledge sharing, pragmatism, organization

EXPERIENCES (REVERSE CHRONOLOGICAL)

e-TF1 — React Native Developer · IPTV

Boulogne-Billancourt · September 2024 → present

- Developing the TF1+ IPTV application in React Native
- Integrating carrier platforms (Bouygues, Free, SFR)
- Managing billing through carrier wrappers

Dayuse.com — React Native Developer

Paris · May 2022 → August 2024

- Sole mobile developer: developing new features and maintaining the application
- Owning the whole process, from task estimation to deployment on Apple, Android and Huawei stores
- Setting up ESLint, Prettier and TypeScript for the CI pipeline on a large existing codebase
- Restructuring the folder architecture and creating a design system with Styled Components
- Redesigning the entire application and setting up global state with Effector
- Stack: React Native 0.71, Stripe / PCI, Mapbox, Codepush, Firebase, Storybook, Effector

Cardiweb — React Native Developer

Paris · February 2020 → June 2022

- Evolving and maintaining a large-scale application for Le Point (Le Point Viper), with many native SDKs
- Creating an event space rental management application with a shared web/mobile codebase
- Stack: React Native, React Native Web, Redux, Batch, AppCenter, Adjust, Madvertise, SourcePoint

Wido — Co-founder, technical lead

Paris · November 2019 → September 2021

- Creating ProDex, a game companion for every version of Pokémon — over 200,000 downloads on iOS / Android
- Stack: React Native, Admob, In-App Purchase, SQLite, Redux, React Navigation

Lexa Solutions — Developer (self-employed)

Paris area · August 2018 → November 2019

- Building end-to-end showcase websites: understanding needs, mockups, development, hosting

Blockin — Co-founder, technical lead

2016 → 2019

- TrackinBlock: a blockchain-based traceability platform (Ethereum, MetaMask, Node.js, MongoDB)
- 3D Factory: a mobile POC for controlling a 3D printer

Qwam & Co — Energy auditor

2015 → 2016

- Carrying out energy audits in the tertiary sector and industry

Capital Energy — Energy consultant

2013 → 2015

- Consultant on energy saving certificates and energy audits for private individuals

EDUCATION

- OpenClassrooms — Self-taught training: React Native, JavaScript, Swift, Docker, Node.js
- ENSIATE — Energy efficiency engineer degree (2015)
- IUT d'Évry — DUT Thermal and energy engineering (2013)

PROJECTS

- **mdNotch** — Drop a document on your notch, get Markdown · Swift
github.com/Akeuuh/mdNotch
mdnotch.lexa.bzh/
- **quickNote** — Persistent note for macOS, infinite Excalidraw canvas · TypeScript
github.com/Akeuuh/quickNote
quicknote.lexa.bzh/
- **feedo** — Baby feeding tracker, shared between caregivers
feedo.lexa.bzh/
- **piqqo** — Your style, powered by AI
piqqo.lexa.bzh/
- **agent-airlock** — Podman sandbox to run Claude Code autonomously · Shell
github.com/Akeuuh/agent-airlock
- **oc-tokens** — Token usage dashboard for OpenCode · TypeScript
github.com/Akeuuh/oc-tokens
- **open-vibe-island** — Open-source alternative to vibe-island for code agents · Swift
github.com/Akeuuh/open-vibe-island
- **Ollamac** — macOS app to interact with Ollama · Swift
github.com/Akeuuh/Ollamac
- **warp** — Agentic development environment · Rust
github.com/Akeuuh/warp
- **fig-autocomplete** — IDE-style autocomplete for the terminal · TypeScript
github.com/Akeuuh/fig-autocomplete
- **homebrew-tap** — Homebrew tap for mdNotch · Ruby
github.com/Akeuuh/homebrew-tap
